

MIRROR ADHESIVE PVC

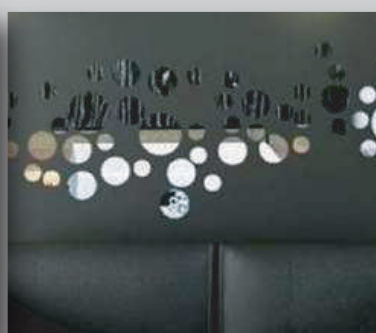

The **mirror adhesive PVC** for their obvious beauty, the close shave and flexibility of use, represent a valuable tool for the decoration of objects, installations locations, sets, exhibitors and can be printed and carved also with digital systems for visual communication.

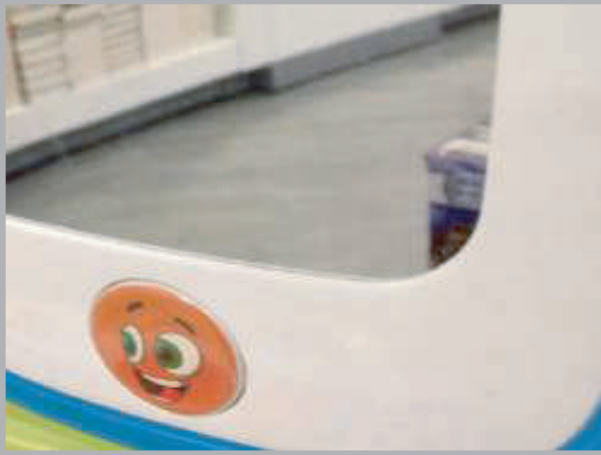

Our **mirror adhesive PVC** is one of the flagships of our production, and, in particular, one of the leading products of our Decorkrome coating line. It is also available in different shapes and sizes.

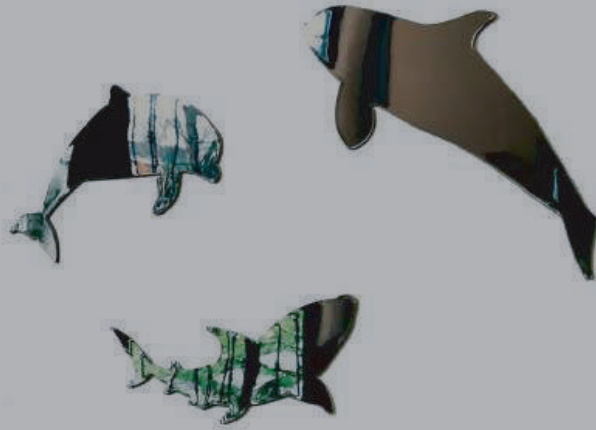

The **mirror adhesive PVC** is equipped with a standard, solvent-based adhesive. On request, it can be equipped with a reinforced adhesive, which is specific for the application on curve or angular surfaces.

Each client can require customized solutions based on their needs.

Available also in stripes starting from height of 5 mm.

The advantages obtained from the use of mirror adhesive PVC are:

- Easy fitting on different surfaces (including MDF)
- No air bubble
- No “orange peel” effective
- Mirror effect excellently simulated
- Customizable with silkscreen printing and digital UV systems
- Excellent look
- Metal-like effect
- Colored mirror effects: silver, gold, dark gray, bronze, polished copper
- Safe protection during transport to preserve the finishing
- Excellent quality/price ratio
